I'm Mangalam, a front-end developer who builds responsive, user-friendly web applications using React.js, Next.js, and TypeScript.

Projects

Volt Vibe — E-commerce Website

2025

- Built a fully responsive e-commerce web application with a React-based frontend styled using Tailwind CSS.
- Implemented product browsing and cart functionality, and deployed the app on Vercel with a connected GitHub repository.

GitHub: github.com/kmangalam910-ui/Volt-Vibe | Live: volt-vibe-eight.vercel.app

Shopify Dashboard — Syncfusion Dashboard

2025

- Built an admin-style analytics dashboard using Syncfusion UI components within a React application.
- Implemented interactive charts, tables, and navigation for clear, quick data insights.

Postogram — Instagram Clone

2024

- Developed core UI components replicating a social media feed and post layout.
- Deployed the project live and maintained the source code on GitHub.
